

YOUR CONNECTED SECURITY PROVIDER

At POA, we provide enterprise security cameras that combine cutting edge technology with intelligent, cloud-based software—all in a secure, user-friendly solution. A simple way to provide added protection to organizations looking to modernize their approach to physical security.

REAL-TIME VISIBILITY. MULTI-FACTOR AUTHENTICATION.

WALL-TO-WALL ENCRYPTION. SECURE, MODERN ARCHITECTURE

Our cameras are always up to date and always secure. Unlike legacy systems, modern technology offers the protection of full encryption and is easy to install, configure, upgrade and expand.

PROGRAM FEATURES

- Wall-to-wall 128-bit AES encryption
- Reduced bandwidth consumption
- Automated firmware/software updates
- 30+ days of video retention & continuous recording
- LTE compatibility
- Livestream/live video access
- Activity-based indexing and search
- Share real-time camera feeds via SMS
- No additional plug-ins or hardware required
- Full Mac Support

SECURE, MODERN ARCHITECTURE

- No NVR
- No insecure ports
- Full HTTPs/SSL encryption
